About Me

I am a passionate person about technology and Software Development. Received a strong education in Software Engineering. Strong skills in Java, Spring Boot, Angular, React Native. Able to develop scalable and maintainable code. Detail oriented and always seeking for the best solution. I am considered to be a person with strong logic and a very good team worker. I also own teaching skills and i get motivated to teach what I know by a sentence of my professor: "I want to give my students the opportunities I didn't have.
